Revision 4

CERTIFICATE VALID FROM:

Jan 22, 2020 To Jan 21, 2021

AUDIT TYPE:

Announced Audit

AUDIT SCOPE:

Visit to the farm in harvest operation, green beans were being harvested during the inspection, the harvesting process was verified, which is carried out manually, the product is placed in plastic boxes, it is taken to the collection center where the weighing is carried out, codification and shipment to the plant for the packaging process. Crate vehicles are used to transport the product from the field to the facilities, it is indicated that they are limited to this function. The water used on the farm for staff operation and equipment cleaning comes from a well. At the time of the audit, interviews are carried out with the available personnel, cultivation areas, sanitary facilities and general storage are verified. There is internal security on the farm, the entry of unauthorized personnel to the cultivation areas is controlled and the perimeter of the farm has a fence. Sensitive areas such as fuel area, water source and general storage are kept with controlled access. No field water is used for the harvesting process. There are 10 employees in harvest work during the inspection, there is adequate labeling at the entrance of the cultivation areas where the staff and the visits are reminded of the established hygiene rules.
